Dear Brethren,

Thank you for your long-time support and brotherly relationship with Ed Wharton. As you know, our brother Ed has been one of the finest Biblically sound preachers, teachers and trainers of Gospel preachers for over 60 years. I know he has had a powerful influence in the lives of people in your congregation as he has in many others around the world.

This letter is to inform you of Brother Wharton's current medical situation and a need which that has created. A few weeks ago, Ed was diagnosed with acute Leukemia. At 94 years of age, he declined harsh chemo/radiation treatments and was sent home on hospice. He was totally bed-fast for a time, requiring additional round the clock nursing care. Ed had been the primary care-giver for his wife, Martha, who has Parkinson's and is legally blind. Round the clock nursing care is very expensive, but that was their only viable choice on short notice.

I am asking you to pray for Ed and Martha Wharton, and if you are able to send a love-offering to help defray some of the medical expenses for the Whartons, it would be a great blessing. Feel free to contact Ed with cards, calls, and personal visits, but please do not mention your financial help. Ed needs your help but would never ask for it and would be embarrassed if he knew I was asking.

If you would like to help, you can send as follows:

Sunset International Bible Institute
Ed Wharton Medical Fund
3723 34th Street
Lubbock, TX 79410

Feel free to contact me if you have questions.

Blessings,

Truitt Adair
SIBI Chancellor

I spoke to Truitt Adair, Chancellor of Sunset, about Ed Whartons care. He said for the first few weeks, they had nursing for 3 shifts, seven days a week and the costs were \$6000 per week. They now have a full time-live in nurse for 5 days and swing shift nurses for the weekend. That has just happened, so he doesn't know what the costs are going to be, just yet. He also said that they received some private donations and were able to pay about 1/2 of the first month's costs. He further said that the doctors best guess is that Ed may have days, weeks or months, but certainly not years. He offered to send me an update on the weekly costs when available. I personally think the \$6k per week is a good p reference.
